

Site and Conservation Data Sheet

Site: (Name of Wreck) Location:	Diver/s Name:
	Date and Time:

Water Temperature at Surface	(°C)
Current on Site (eg. 2 knots NE)	
Evidence of Structural Collapse (photograph)	Yes No Depth: Position/s:
Description of lowest point (LP) on wreck (Mark LP location on mud map)	
Site Dimensions (approx. in (m))	Length: Width:
General Seabed Topography Near Site	Flat Crest Slope
Sediment Slope on Wreck Ste (gradient) (Circle one)	Flat (1 - 2m variation) Slight incline (2 - 4m variation) Steep incline (5m or > variation)
Vegetation Cover on Seafloor (Circle one)	0 - 20% 21 - 40% 41 - 60% 61 - 80% 81 - 100%
Evidence of Recent Active Corrosion	Yes No Depth: Position/s:

Visibility in water (Circle one)	<5m 5-10m >10 m
Site Orientation and Compass Direction (Bow to Stern) i.e. 60 degrees East-South East	Upright Upside down Lying on port side Lying on starboard Listing port Listing to starboard
Composition of Dominant Wreck Material Visible	Iron Aluminium Wood
Depth (m) and Temperature (°C) at LP on wreck	(m) (°C)
Mobility of Sediment Surface (i.e. rippling - direction and spatial frequency (cpm))	
Sediment Colour Gradation Over Site (Mark area on mud map and Photograph)	Yes No
General composition seafloor (Circle most relevant)	Coral Limestone outcroppings Sand Pebbles Boulders Clay Seaweed Seagrass
Percentage of coverage on exposed wreck material by fouling organisms (Circle one)	0 - 20% 21 - 40% 41 - 60% 61 - 80% 81 - 100%
Evidence of Seasonal or Storm/Cyclone Exposure	Yes No

Types of fouling organisms on wreck (animal or plant attached to surface) (photograph with small colour scale)	Yes	No
Is contemporary rubbish present around the site (Circle those relevant)	Yes beer cans fish nets plastic other:	No glass bottles fishing line tyres rope
Evidence of human disturbance (Circle most relevant, mark area/s on mud map and photograph)	Yes anchor damage objects moved exposed artefacts other: Depth: Position/s:	No digging broken timbers
Description of highest point (HP) on wreck (Mark HP location on mud map)		

Evidence of timber infestation by marine borers (photograph with small colour scale)	Yes	No
Approx. no. of pieces of rubbish around site (Circle one)	0 – 20 41 – 60 81 – 100	21 – 40 61 – 80 >100
Is there sediment build up on site or around features (Mark area/s on mud map and photograph)	Yes Depth: Position/s:	No
Depth (m) and Temperature (°C) at HP on wreck	(m) (°C)	

Material/s (i.e. Metal, Ceramic, Glass, Stone, Rope, Timber (Bamboo, other), Leather, Textile, Skeletal (bone, horn, shell))	Object Description	Apparent Condition	% Degree of Completeness	Location Description and Reference Number on Mud Map
